

To-Do List Application

Project Demo

Project Overview

A simple and interactive **To-Do List** application that allows users to add, complete, edit, and delete tasks. All tasks are saved automatically in the browser using `localStorage`.

Technologies Used

Technology	Purpose
HTML5	Page structure
CSS3	Styling and animations
JavaScript (ES6)	Logic and interactivity
<code>localStorage</code>	Data persistence

Project Structure

```
text
```

```
To-Do-List/
```

```
|— index.html    ← Structure
```

└─ style.css ← Styling
└─ script.js ← Functionality

✨ Key Features

◆ Add Tasks

- Type a task in the input field
- Click "**Add**" button or press **Enter** key

◆ Complete Tasks

- Click on the **circle** next to the task
- Or click on the **task text** itself
- Completed tasks appear with a **strikethrough** effect

◆ Edit Tasks

- Click the  (**Edit**) button
- A prompt appears to modify the task text

◆ Delete Tasks

- Click the  (**Delete**) button
- Confirmation dialog appears before deletion

◆ Clear All

- Click "**Clear All**" button
- Deletes all tasks at once (with confirmation)

◆ Statistics

- Displays total number of tasks
- Displays number of completed tasks

◆ Auto-Save

- All tasks are saved automatically to localStorage
- Tasks persist even after closing the browser

User Experience Walkthrough

Step	Action	Result
1	Open the page	Empty task list with "No tasks yet" message
2	Type "Buy groceries"	Text appears in input field
3	Click "Add" or press Enter	Task appears in the list with a circle and text
4	Click the circle or text	Task becomes completed (strikethrough + filled circle)
5	Click  button	Prompt appears to edit task text
6	Click  button	Confirmation dialog appears
7	Click "Clear All"	All tasks are removed
8	Close and reopen browser	Tasks are still there (saved in localStorage)

UI Design

Colors:

- Background: Gradient from #f5f7fa to #e9edf5
- Primary: #818cf8 (Indigo)
- Task cards: #ffffff (White)
- Completed tasks: Strikethrough with opacity

Animations:

- Slide-in animation when adding new tasks
- Smooth hover effects on cards
- Scale effect on buttons

Strengths

- ✓ Simple and intuitive interface
- ✓ Works without internet connection
- ✓ Data persistence with localStorage
- ✓ Responsive design (works on all devices)
- ✓ Keyboard support (Enter key)
- ✓ Clean and modern design

How to Run

1. Create folder: To-Do-List
2. Create files: `index.html`, `style.css`, `script.js`
3. Copy code into respective files
4. Open `index.html` in browser

Sample Tasks to Try

text

1.  Study for exam
2.  Complete project
3.  Go to the gym
4.  Buy groceries
5.  Call family
6.  Read a book
